

How To Waterproof Your CAPSS® or PIISA® Perimeter Alert Unit:

The Capps® and PIISA® perimeter alert systems are not waterproof but by using the included 100 MPH duct tape that is included you can create a “rain roof” by simply cutting the provided strip in half and sticking on the top surface.

An alternative method is to use any small zip-lock type sandwich bag but cutting both sides to create an “A” tent that allows the fishing line out both sides. After cutting both sides and affixing the fishing line trip wire out both sides, zip-lock the bottom shut.

In severe rain and wind you can use both methods combined if required.

Any questions contact customerservice@brite-strike.com or call between 9:00 AM and 5:00 PM Monday through Thursday.
